

Kelly Englerth, RN

Rochester Regional Health System

Kelly is a dedicated and compassionate hospice nurse and truly cares for her patients. She is fully present with patients and families and is an advocate for all. She has a true "hospice heart" and loves taking care of people.

During the Covid-19 spikes, our unit was short staffed with illnesses in addition to normal holiday staffing issues. Kelly stepped up and filled in over and above her normal schedule (days, evenings and nights) without complaint.

Families and patients easily relate to her, she has excellent assessment skills and critical thinking abilities that help her manage complicated situations, and she was particularly helpful during the pandemic when it was often necessary to manage heightened emotions or diffuse stressful situations.

Kelly has a diverse background of nursing skills and experience, and with that she brings a comprehensive approach to her patient care. She puts the needs of her patients and her team above her own, and is an invaluable asset to us at Rochester Regional Health.

We are proud of her commitment and believe she is uniquely deserving of HCA's Caring Award.

Congratulations Kelly!
